

REMARKS

The papers received from the Patent Office, including the Notice of Allowance, show the title of the application as translated at the international stage of this PCT application. Applicants presented a substitute specification with a new title upon entry into the U.S. national stage. However, this new title was not entered into the records of this case.

Applicants request that the title as entered into the Patent Office records be changed as indicated in the foregoing. Further, Applicants request that the patent issue with the new title.

No new issues of patentability are raised by this amendment and the application need not be withdrawn from allowance. Entry of the amendment is hereby requested.

Respectfully submitted,

Melvin A. Robinson (Reg. No. 31,870)
